#### Introduction

#### Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001, Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be

associated with the autonomic nervous modulat

Acupuncture or acupressure at the Neiguan ( in the pericardium meridian, has been shown to 1987, 1988, 1989a and b; Ho *et al.*, 1989; De *A et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 20 related to autonomic nervous activity (Morro speculated that the autonomic nervous activity P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with depressed vagal modulation, and the restoration of vagal modulation is associated with the improvement
